kaza LIVE alert

FLASH & BEEP

KAZA LIVE ALERT FLASH & BEEP is the new proposal by CDP for all types of drivers. Essential before getting behind the wheel. **KAZA LIVE ALERT FLASH & BEEP** has been designed to warn in advance of the presence of radars through lights and a perceptible audible alarm. The closer we get to a radar, the greater the warning with flashing lights and beeping sounds. The device works thanks to its Bluetooth connection to a mobile phone and our **KAZA LIVE** application. This application will inform you of the presence of fixed radars, the proximity of the PEGASUS helicopter, and possible mobile radar controls, among others.

Avoid unpleasant surprises on the road and expensive traffic tickets. The **KAZA LIVE ALERT FLASH & BEEP** device is less expensive than any speeding fine. Because of its small size and features, it is ideal to carry it on both motorcycles and four-wheel vehicles. Its packaging includes a strong fastening system to perfectly install the unit on your motorcycle handlebars. If you want to use it in your car, it also includes a strong magnet for your dashboard. This device is very versatile, discreet and extremely functional.

The **KAZA** brand, leader in the field of radar detectors and warning units, continues to innovate with practical solutions for all drivers.

With **KAZA LIVE ALERT FLASH & BEEP**, you will feel you're carrying a genuine protective shield.
